

Breathing

Some preliminary exercises
(keep slow counts)

- I
- ◆ Exhale completely – stay empty for 8 counts – Inhale for 8 – hold for 8 – breathe out in 8 – stay empty for 8. Repeat 8 times.
 - ◆ Exhale completely – stay empty for 8 counts – Inhale for 8 – breathe out in 1 – hold for 8 – stay empty for 8. Repeat 8 times.
 - ◆ Exhale completely – stay empty for 8 counts – Inhale in 1 – hold for 8 – breathe out for 8 – stay empty for 8. Repeat 8 times. Increase the counts.

- II
- Take the biggest possible breath and then keep adding a sipping breath until no more can be taken

- III
- Sit in chair. Keep knees together and bend head as far down as possible, then inhale the full capacity. Repeat several times and the intercostal area will be developed.

- IV
- Blow great gusts of air through the trumpet (first remove the mouthpiece). Be careful, at first you might get dizzy. 8 or 10 times are plenty after you get used to the exercise.

Respiration

Quelques exercices préliminaires
(toujours compter lentement)

- I
- ◆ Se vider – rester vide (8 temps) – Inspirer (8 t.) – retenir (8 t.) – expirer (8 t.) – rester vide (8 t.) – Répéter 8 fois.
 - ◆ Se vider – rester vide (8 temps) – Inspirer (8 t.) – expirer (1 t.) – rester vide (8 t.) – Répéter 8 fois.
 - ◆ Se vider – rester vide (8 temps) – Inspirer (1 t.) – retenir (8 t.) – expirer (8 t.) – rester vide (8 t.) – Répéter 8 fois. Ajouter des temps

- II
- Inspirer d'un coup au maximum des capacités, puis ajouter encore de l'air par petites "gorgées", jusqu'à ce que plus rien n'entre.

- III
- Assis sur une chaise, genoux joints, plier buste et tête aussi bas que possible, puis inspirer à fond. Répéter l'opération plusieurs fois. Développe la région intercostale.

- IV
- Souffler de grands coups d'air à travers l'instrument (sans l'embouchure). Attention aux étourdissements! Il est suffisant de faire cet exercice 8 à 10 fois lorsqu'on y est habitué.

Atmung

Verschiedene Vorübungen
(immer langsam zählen)

- I
- ◆ Sich leeren – leer bleiben (8 Schläge) – einatmen (8 Schl.) – Atem anhalten (8 Schl.) – ausatmen (8 Schl.) – leer bleiben (8 Schl.) – 8 Mal wiederholen.
 - ◆ Sich leeren – leer bleiben (8 Schläge) – Einatmen (8 Schl.) – ausatmen (1 Schl.) – leer bleiben (8 Schl.) – 8 Mal wiederholen.
 - ◆ Sich leeren – leer bleiben (8 Schläge) – Einatmen (1 Schl.) – Atem anhalten (8 Schl.) – ausatmen (8 Schl.) – leer bleiben (8 Schl.) – 8 Mal wiederholen. Taktzahl erhöhen.

- II
- Auf einmal tief einatmen, dann weitere kleine Luftschlucke dazu nehmen, bis nichts mehr in die Lunge geht.

- III
- Auf einen Stuhl sitzen. Knie zusammen. Oberkörper so tief wie möglich nach unten beugen und tief einatmen. Übung mehrmals wiederholen. Entwickelt die Zwischenrippenräume.

- IV
- Luft heftig durch das Instrument blasen (ohne Mundstück). Achtung auf Schwindelgefühl. Nach erfolgter Gewöhnung genügt es, diese Übung 8 bis 10 mal zu wiederholen.

Fingerings

Play all pedal notes with the same fingering that is used an octave higher. If pedal C will not respond, use the 1-2-3 valve combination (see page 7).

Doigtés

Jouer toutes les notes pédales avec le doigté usuel de l'octave supérieure. Si le Do pédale ne sort pas, employer le doigté 1-2-3 (voir page 7).

Fingergriffe

Die Pedalregisternoten sollten mit jenen Fingergriffen gespielt werden, die eine Oktave höher gebräuchlich sind. Wenn das Pedal-C nicht kommt, Griff 1-2-3 verwenden (s.S. 7).

Signs

— This sign must be understood. There must be **no** indication which direction (up or down) the slur is going.

— **Hold** the upper note (precisely 3 more counts).
The rule "keep thinking down going up and thinking up going down in order to avoid playing sharp when ascending or flat when descending" holds the notes in their proper place.

— 1/2 tone down lip bend (bend rhythmically as if depressing a valve).

— don't drop note (use valves)

Signes

— Indique que le son de la note de départ ne doit **pas** trahir la direction (haut ou bas) de la suivante.

— **Tenir** la note la plus haute (exactement 3 temps supplémentaires).
La règle "penser à rester en bas en montant et rester en haut en descendant pour éviter de jouer trop haut en montant ou trop bas en descendant" maintient les notes à leur juste place.

— "Courbure" labiale d'un 1/2 ton descendant ("courber" rythmiquement, comme si c'était avec un piston).

— Ne pas laisser "tomber" la note (employer les pistons).

Zeichen

— Bedeutet, dass der Ausgangston die Richtung des nächsten Tons **nicht** verraten darf (nach oben oder nach unten).

— Der höhere Ton muss **gehalten** werden (genau 3 zusätzliche Schläge).
Die Regel "denken unten zu bleiben wenn man aufsteigend spielt, und oben bleiben, wenn absteigend, um zu vermeiden, beim Aufsteigen zu hoch und beim Absteigen zu tief zu blasen" hält die Töne an ihrem richtigen Platz.

— mit den Lippen um 1/2 Ton nach unten "biegen" (rhythmisch genau, so wie mit den Ventilen).

— Note nicht fallen lassen (Ventile benötigen).

Arnold Jacobs Breathing Exercises

1. Raising Arms Above Head and Inhaling

The purpose of this exercise is to practice “general thoracic breathing”, which involves the expansion of the rib cage and abdomen. It must be done in front of a mirror.

While snapping fingers to a slow count to 5, raise both your arms above your head and inhale as much air as you can. You want inhale the air at an even rate—don’t take in too much at the beginning or end.

Drop your arms, don’t exhale, and look at yourself in the mirror. Observe how much your chest is “puffed out.” Then exhale.

Repeat several times.

2. Inhaling as above, but not raising arms above head.

This also must be done in front of a mirror.

While snapping your fingers to a count of 5, evenly inhale to your full capacity. Allow your rib cage to expand fully. It should look like it did when you dropped your arms in the exercise above.

Take a look at yourself, then exhale. Repeat several times.

3. Breathing in Thirds

This study allows you to feel different quantities of air in your lungs. We have a limited ability to do this, especially when playing an instrument.

Jake's Breathing Exercises Page 2

Use an arm as a gauge. Fully extended=empty lungs. One third of the way contracted=one third full lungs. Two thirds of the way contracted=two thirds full lungs. Fully contracted=full lungs. Make sure that your lungs are completely empty to start, and completely full when at 3/3. Then breathe out in thirds, again using the arm as a gauge.

Now, try different combinations of quantities of air. Go from 2/3 full to empty, to 3/3 full, to 1/3 full, etc.

4. 5/4 Study

This study prepares you for quick, full inhalations.

Conduct a 5/4 pattern with one hand. On beat 5, breathe in to your maximum capacity. On beats 1-4, breathe out evenly, so that by the end of beat 4, your lungs are empty. Then completely fill up on beat 5.

You'll want to do this very slowly, or you'll hyperventilate. Make sure that you exhale evenly throughout the first four beats, and that you're really pushing the last of your air out on the fourth beat. Then fill up completely—you can't possibly take in any more air—on beat 5.

Do this three times, then stop.

5. 4/4 Study

This exercise is like the 5/4 study, but you'll be conducting in 4/4. Breathe in on the last 1/8th note of the bar—the "and of four". Breathe out for beats 1-4½. Make sure you completely fill up with air and get completely empty.

Do this several times.

6. Two Bars of 4/4 Study

This is the same as the 4/4 study, except that you're going to exhale for two bars and tongue eighth notes as you exhale. Breathe in on the "and of four" in the second bar. Completely fill up with air, and get completely empty by beat four of the second bar.

Do this several times.

♩ = 63

I.

First time: molto portamento ("Siren style")

Second time: as written

Exercise I musical notation, measures 1-4. Measure 1 is circled with a 1. Measure 2 is circled with a 2. Measure 3 is circled with a 3. The notation shows a series of eighth notes with slurs, indicating a "Siren style" portamento effect.

Play w/ piano

II.

♩ = 56

(1) fermatas first time only

Exercise II musical notation, measures 1-8. Measures 1-4 are circled with numbers 1-4. Measures 5-8 are circled with numbers 5-8. The notation shows eighth notes with slurs and fermatas, indicating a "fermatas first time only" instruction.

V.

Exercise V consists of eight numbered staves, each containing a musical phrase in treble clef. The staves are arranged in two columns of four. Each staff begins with a circled number (1 through 8). The music is written in a single system, with a double bar line separating the two columns. Each phrase is marked with a slur and a fermata at the end. The key signature is one sharp (F#), and the time signature is not explicitly shown but appears to be 4/4 based on the notation. The phrases are as follows:

- Staff 1: Starts on G4, moves up stepwise to D5, then down to G4, marked with a fermata.
- Staff 2: Starts on G4, moves up stepwise to D5, then down to G4, marked with a fermata.
- Staff 3: Starts on G4, moves up stepwise to D5, then down to G4, marked with a fermata.
- Staff 4: Starts on G4, moves up stepwise to D5, then down to G4, marked with a fermata.
- Staff 5: Starts on G4, moves up stepwise to D5, then down to G4, marked with a fermata.
- Staff 6: Starts on G4, moves up stepwise to D5, then down to G4, marked with a fermata.
- Staff 7: Starts on G4, moves up stepwise to D5, then down to G4, marked with a fermata.
- Staff 8: Starts on G4, moves up stepwise to D5, then down to G4, marked with a fermata.

This page contains two musical exercises, numbered 5 and 6. Exercise 5 consists of 8 staves, each featuring a melodic line with a long, sweeping slur. The key signatures for the staves of exercise 5 are: F# (1), F#F#F# (2), Bb (3), F#F#F# (4), BbBb (5), F# (6), BbBbBb (7), and F# (8). Exercise 6 consists of 6 staves, each featuring a similar melodic line with a long, sweeping slur. The key signatures for the staves of exercise 6 are: BbBb (1), BbBb (2), F#F#F# (3), Bb (4), F#F#F# (5), and F# (6). The notation includes various note values, including eighth and sixteenth notes, and rests, all connected by long, flowing slurs.
